

# **2013 MISSOURI CERTIFIED**

## **Nursery and Greenhouse Directory**

### **Plant Industries Division Missouri Department of Agriculture**

To serve, promote, and protect the agricultural producers,  
processors, and consumers of Missouri's  
food, fuel, and fiber products.

# **Inspection and Certification Of Missouri Nurseries and Greenhouses**

This is to certify that the nurseries listed in this directory have been duly inspected and properly certified and licensed to sell nursery stock in the state of Missouri beginning October 1 and ending September 30. This certification is based on an annual inspection and periodic re-inspections by area horticultural inspectors and apparent freedom from especially harmful plant pests.

Greenhouses listed in this directory have received semiannual inspections and are properly certified and licensed to do business in Missouri for the period beginning December 1 and ending November 30.

# **MISSOURI PLANT LAW**

## **(Sections 263.010 - 263.180)**

It shall be illegal to sell, give away or transport nursery stock in the state of Missouri unless said nursery stock has been properly inspected and is accompanied by a valid inspection certificate.

Any person, company or corporation other than a Missouri nurseryman selling or offering for sale, or giving away nursery stock in the state of Missouri, must first obtain a nursery dealer's registration inspection certificate.

Any interested party may apply for an inspection or certificate at the Plant Industries Division, Missouri Department of Agriculture, P.O. Box 630, Jefferson City, MO 65102; telephone 573-751-5505.

Nursery stock is defined as "...all plants having a persistent woody stem, perennials, bulbs, roots, crowns, corm, rhizomes and tubers capable of propagating, including strawberry, asparagus and rhubarb, but excluding seed potatoes and other garden vegetables. Grass sod, stolons and plugs distributed for the purpose of propagation are also included in the term nursery stock."

## **STATES REQUIRING INDIVIDUAL CERTIFICATION**

If Missouri nurseries are required to file a certificate of inspection prior to doing business in any other state, this directory is designed to satisfy that requirement in lieu of a separate certificate from each Missouri nursery.

Nursery inspection tags must accompany all shipments of nursery stock, within Missouri and to other states as well. Instructions for printing these tags were sent with the certificate of inspection.

Greenhouse inspection tags are not required for shipment within Missouri, however, they should accompany all out of state shipments. The printing of greenhouse tags is the same as for nurseries.

Wyoming and Idaho charge a license fee to all out-of-state nurseries and plant dealers. Prior to doing business in these states, apply for an out-of-state nursery license.

Colorado requires out-of-state nurseries to designate a resident agent within that state prior to doing business. Contact Colorado for specific information.

### **MISSOURI CERTIFIED NURSERIES**

The Missouri Plant Law requires the annual inspection of all nursery stock sold, offered for sale or transported within the state, and all stock must bear a valid inspection certificate at all times. The regular inspections are made during the summer months of June, July, and August. When insect pests and plant diseases are found, certification is contingent upon their eradication and the nursery is required to carry out recommended control measures promptly. Re-inspections are made to confirm the elimination of pests. Nursery stock must be destroyed if infected or infested with pests that cannot be eradicated.

Sod is considered nursery stock in Missouri and requirements are the same as above. Bulbs, brambles, and strawberry plants are also defined as nursery stock and they receive dual inspections each year.

Certified nurseries are licensed to operate from October 1st to September 30th of each year.

### **MISSOURI CERTIFIED GREENHOUSES**

The inspection/certification of greenhouses is not compulsory under the Missouri Plant Law and is performed only upon request. A grower of greenhouse plants who desires, or finds need for a certificate of greenhouse inspection, may obtain a semiannual inspection of their greenhouse premises and plants by making application to the State Entomologist.

Vegetable transplant inspections are conducted upon the request of the owner and are based upon the requirements of the destination state.

Certified greenhouses are licensed to operate from December 1st to November 30th of each year.

### **MISSOURI CERTIFIED NURSERY DEALERS**

The Missouri Plant Law requires that each nursery dealer, before selling or offering for sale, or otherwise distributing nursery stock within this state, must annually obtain a Nursery Dealer's Registration-Inspection Certificate for each individual location from which the said dealer sells or offers for sale nursery stock. Each nursery dealer shall make application on forms to be provided by the State Entomologist for each individual location.

A nursery dealer shall obtain and distribute only inspected and certified nursery stock. The State Entomologist may inspect, or cause to be inspected, the premises including any sales yard, packing shed, nursery stock on hand or equipment for the presence of dangerous and destructive insect pests and plant diseases which may be disseminated on nursery stock.

Nursery dealers are licensed to operate from October 1st to September 30th of each year.
